

March 12, 2014

The Honorable John Boehner
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

The Honorable Nancy Pelosi
Democratic Leader
U.S. House of Representatives
Washington, DC 20515

Dear Speaker Boehner and Leader Pelosi:

On February 11, 2014, U.S. Representative Jim McDermott (D-WA) introduced, at the request of the American Academy of Audiology (AAA), H.R. 4035. As written, H.R. 4035 inappropriately provides audiologists with unlimited direct access to Medicare patients without a physician referral. This legislation represents a recycled legislative effort that is opposed by the undersigned organizations.

We strongly believe that a physician-led hearing healthcare team with coordination of services is the best approach for providing the highest quality care to patients. While audiologists play a critical role in providing quality hearing healthcare, aspirations of some audiologists to independently diagnose hearing disorders transcends their level of training and expertise.

In a report on the audiology direct access issue, the Centers for Medicare and Medicaid Services (CMS) declared that referrals from physicians are the “key means by which the Medicare program assures that beneficiaries are receiving medically necessary services, and avoids potential payment for asymptomatic screening tests that are not covered by Medicare” Bypassing a physician evaluation and referral can lead to a misdiagnosis and inappropriate treatment that could cause lasting, and expensive, harm to patients.

As a legislator, we know you share a physician’s commitment to promoting patient safety and the highest quality healthcare. While audiologists are valued health professionals who work for and with physicians, they do not possess the medical training necessary to perform the same duties as physicians, nor are they able to provide patients with the medical diagnosis and treatment options they require.

For the health and well-being of America’s seniors, we respectfully urge you to oppose any efforts to advance this ill-advised legislation. Thank you for your consideration, and please contact the American Academy of Otolaryngology—Head and Neck Surgery at legfederal@entnet.org with any questions.

Sincerely,
